Dear Victor Martinez,

Thanks for your note, dated the 28th, the day it got here, and the enclosures.

In genefal I hold those who present unproven theories as solutions in low regard and to date I've not found one that is tenable. They can and do appear to be reasonable to those who lack a solid factual foundation in JFK assassination information and when the ripoff artists merely make it up they can make it attractive. But I've not seen one that stack and I take little time for them. At my age I can put that time to better use. But I'll read what you sent in odd free moments.

And I thank you for it,

Harold Weisberg
